THE CLMS CATTLE EVALUATION FIELD DAYS/COURSES

HOW TO VALUE ADD TO YOUR **GRASS-ROOTS** CATTLE ENTERPRISE
AIM - To provide participants with the knowledge and practice in
evaluating cattle using the Classic Livestock Evaluation System.

THE COURSE/FIELD DAY WILL PROVIDE YOU WITH INDICATORS TO
ASSIST IN YOUR SELECTION OF TENDER, FERTILE, CONSISTENT AND
BALANCED CATTLE BY CONSIDERING THE FOLLOWING:

- * How to build consistency into your herd.
- * How to identify the keys to increasing fertility in your herd.
- * The relationship between feminine and masculine traits.
- * The importance of good hormonal activity in your animals and how to recognise the key indicators for it.
- * How hormonal activity affects an animal's overall performance and general health.
- * How to select cattle for tenderness of meat on the hoof.
- * The importance of cows that produce high quality milk.
- * How to recognise the indicators of milk quantity and quality in both cows and bulls.
- * How to "read" a bull's scrotum as the mirror to his daughter's udders.
- * How to measure the main parts of an animal to identify their overall balance

IS THERE VALUE IN THIS COURSE FOR YOU?

- *If you increase your calving percentage by 2%+, would that cover the cost of this course for you?
- *If you increased the number of offspring you sold in the first draft by 5% through greater consistency, would that be more profitable for you?
- *If your herd were better feed converters and lower maintenance animals, would that be more profitable for you?
- *When you are paid for saleable meat yield, which will start to happen in the next 2 years, do you want higher yielding cattle?

INFORMATION FROM THIS FIELD DAY/COURSE WILL PROVIDE THIS AND MUCH MORE.
